Category	Description	Credits	Contribution of Amorim Revestimentos Products	Available Points
Health and Wellbeing	Its objective is to increase the comfort, health and safety of the building users, that is, an increase in the life quality of the building, recognizing those who encourage a healthy and secure indoor and outdoor environment.	Indoor Air Quality	Since the products have reduced volatile organic compounds (VOCs) emissions and other pollutants, proven by GREENGUARD certification,	1-5
Materials	Its objective is to reduce the impact of the construction materials throughout the project development, construction, maintenance and repair. It focuses on obtaining materials of responsible origin that have a low impact throughout their entire life cycle.	Life Cycle Impacts	Since the products have Environmental Product Declaration (EPD), they contribute to the direct obtainment of points. To get one point it is necessary to use at least 5 different products with EPD.	1*
		Designing for Durability and Resilience	Because they are resilient floors, and of high durability they contribute indirectly to obtain 1 point.	1
		Material Efficiency	Because they are resilient floors, of reduced maintenance, they minimize the environmental impact of use and waste of materials, contributing indirectly to obtain 1 point.	1
Total Maximum Credits Possible				8

*Except Wood Hydrocork Plus, Wood Infinitus, Wood Essence, Wood Start LVT, Wood Start SPC (0 points)

Category	Description	Credits	Contribution of Amorim Revestimentos Products	Available Points
Materials and Resources	Its objective is to reduce the energy used and other impacts related with the extraction, processing, transport, maintenance and disposal of construction materials.	Building Product Disclosure and Optimization - Environmental Product Declarations	Since the products have Environmental Product Declaration (EPD), they contribute to the direct obtainment of points. To get one point it is necessary to use at least 20 different products with EPD. For 2 points, it is necessary to use 40 products with EPD.	1-2*
Indoor Environmental Quality	Its objective is to provide a good indoor air quality, so as to protect the health and comfort of all the building's users. It allows to improve productivity, it enhances the building value and reduces the owner's responsibilities.	Low-Emitting Materials	Since the products have reduced volatile organic compounds (VOCs) emissions and other pollutants, proven by GREENGUARD certification, they have a direct contribution to points.	1-3
		Indoor Air Quality Assessment	Since the products have reduced volatile organic compounds (VOCs) emissions and other pollutants they have an indirect contribution to points.	1-2
Total Maximum Credits Possible				7
